Featured Project

URL Shortener - Full Stack Development

<https://shortener-production-1fa3.up.railway.app>

- URL Shortener Project: Fullstack web application developed with Node.js and React.
- Authentication: Implemented JWT (JSON Web Tokens) for secure user authentication.
- Key Features:
 1. **URL Shortening:** Allows users to generate short URLs from long URLs.
 2. **User Dashboard:** Displays shortened URLs with click statistics.
 3. **URL Management:** Option to delete shortened URLs.
- **Statistics:** Tracks the number of clicks for each shortened URL.

Programming Education

Full Stack Development Course, Globant/Cepit 2022- 2023

- Intensive training program covering full-stack development skills.

NestJS: Node + Typescript Course, Udemy (Instructor: Alejandro Lora)

- Completed comprehensive course on NestJS, enhancing proficiency in Node.js and TypeScript.

About Me:

I'm Tomas Madariaga, a 22-year-old aspiring professional born on December 17, 2001. I currently reside in Coronel Dorrego, Buenos Aires province. Known for my strong teamwork and dedication, I am eager to contribute my skills and bring a positive attitude to any work environment.
