Featured Project

URL Shortener - Full Stack Development

- Fullstack web application developed with Node.js and React.

- Authentication: Implementation of JWT (JSON Web Tokens) for secure user authentication.

- Main Features:

- **URL Shortening:** Allows users to generate short URLs from long URLs.
- **User Dashboard:** Visualization of shortened URLs with click statistics.
- **URL Management:** Option to delete shortened URLs.
- **Statistics:** Tracking the number of clicks for each shortened URL.

About me

I am Tomas Madariaga, a budding professional, 21 years old, born on December 17, 2001. I currently reside in Coronel Dorrego, Buenos Aires province. Known for my strong teamwork and dedication, I am eager to contribute my skills and bring a positive attitude to any work environment.

Education
